

MERCEDES-BENZ PLACES

MIAMI

The Future of Luxury Living in Brickell. Inspired by Innovation. Designed for Life.

A Legendary Hybrid

Where German engineering meets the soul of Miami.

Mercedes-Benz Places in Brickell isn't just a residential building—it's a statement. For the first time in North America, Mercedes-Benz's "Sensual Purity" design philosophy transforms into an iconic residential tower.

Developed by JDS Development Group and designed by award-winning SHoP Architects, this project is a symphony of aerodynamics, cutting-edge technology, and meticulous luxury.

First Mercedes-Benz residential tower in the U.S.

Located in the financial heart of Brickell

A new icon in Miami's skyline

The Manhattan of the South

The epicenter of energy, finance, and lifestyle.

Brickell City Centre

Luxury shopping and world-class dining

Financial District

Latin America's most important business center

Water Access

Biscayne Bay and Miami River as your backyard

Sensual Purity in Height

Sculpted by wind, defined by light.

The design of Mercedes-Benz Places directly translates automotive aesthetics into vertical architecture. The tower isn't static—it appears to be in motion.

The unique structure of stacked cubes and wraparound terraces maximizes views and private outdoor spaces. Signature Mercedes-Benz colors—arrow silver and technical black—dominate the exterior palette.

01

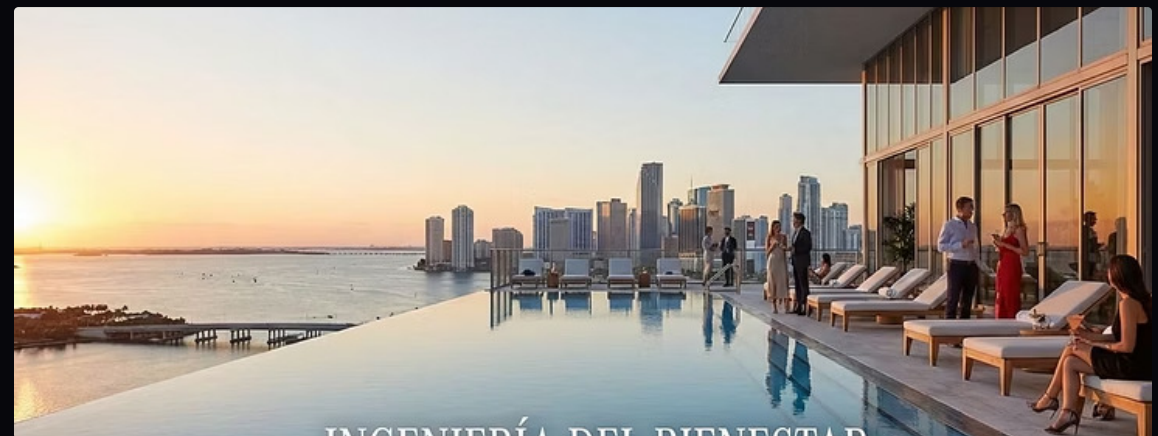

Design by SHoP Architects

02

Dynamic façade capturing Miami light

03

Green spaces integrated vertically

Every Detail Counts
